Family Math Night Kits

8 Benefits of Hosting a Family Math Night Event

Promotes family involvement with math.

Fall carnivals, jog-a-thons, and spring flings...all are great ways to involve parents in their child's school experience. But a Nifty Numbers or Math Medley Family Math Night is unique because they purposefully connect parents to classroom learning and reinforce the role they have as active participants in the education of their children.

Designed by a veteran elementary math teacher.

With over 25 years of classroom experience, creator Karyn Hodgens knows how to take important mathematical content and turn it into something fun and engaging. You can rest assured that through all the giggles and smiles, kids are learning important math!

Kids create fun projects.

Our kits bring out the creativity in kids through hands-on projects and activities that they get to take home and share with others. Kids love the ownership that comes with choosing how they want to accomplish the task.

Reinforces what goes on in the classroom.

Consider Nifty Numbers and Math Medley the fun way of getting math homework done. The National Council of Teachers of Mathematics and Common Core State Standards-aligned activities are hands-on, fun, and engaging, making them the perfect complement to classroom learning.

All the work is done for you.

Our kits come complete with all the lessons and manipulatives needed for 8 hands-on stations which serve up to 120 students and their parents (Booster Packs available for larger schools). Short video tutorials, reference guides, and check-off sheets make hosting the event super easy for parents, teachers, or administrators. No background in math is needed.

Builds strong family-school partnerships.

Gone are the days when a parents' role in their child's school was simply being the room parent or helping with the fall carnival. Today's school actively engages parents as partners around student learning and Nifty Numbers and Math Medley Family Math Nights are a perfect example of this in action.

You own the kit forever.

Unlike an assembly that packs up and leaves at the end of the day, your kit is yours to use over and over. And because the stations are leveled, *beginning*, *intermediate*, and *advanced*, students have new activities to explore each time.

You'll receive personal attention.

Our goal is to make sure you have a successful Family Math Night event. If you have any questions about your kit, the activities, or anything else along the way...call or email us and we'll get back to you promptly. We want you to be satisfied and happy.
